

## Hands' hygiene

A simple and responsible gesture

## Protect health

of guests, collaborators and users in all places

# evercleanHAND

Health reflex at your fingertips

## Hands' hygiene by an innovative process

A hands sanitizer that easily applies an environmentally friendly disinfectant lotion, healthy for the skin.

### Easy access & efficiency

The device is always located near the users. Simple to access and touch less, EverCleanHand is easy to use. Disinfection is achieved in 7 seconds. Nebulization allows a better distribution of the lotion over the entire surface of the hands.

### Control & monitoring

Ideal for creating a key performance indicator of hands hygiene; through the 3G connection, the interface provides real-time tracking data. A text and e-mail alert is sent in case of low lotion level.

### Social & environment

80% of infections are transmitted by hands. Automatic disinfection reduces absenteeism in the workplace. The use of EverCleanHand significantly reduces the consumption of drinking water. The device is eco-designed and recycled. The lotion is biodegradable, approved for mouth contact and is made from renewable resources.

### Integrated screen

An integrated screen displays a customizable message to users (information, advertising, menu, program, message, etc.).

### Disinfecting lotion

Végétale & biodegradable  
Moisturizing & smooth
